## L'estrès

També hi ha un altre aspecte molt important que has de tenir en compte per tenir cura de les teves emocions: l'estrès. És una reacció del cos i del cervell que es produeix quan t'has d'enfrontar a algun canvi, et trobes davant d'un repte o experimentes algun problema o decepció.

L'estrès puntual és una reacció normal, útil i necessària, i no t'ha de fer por. Et permet focalitzar l'atenció en el canvi i el repte, i activa l'energia del teu cos perquè hi puguis fer front.

Ara bé, has d'evitar l'estrès crònic. És aquell que dura massa, fins i tot pot perdurar dies o setmanes. Aquest perjudica la teva salut: fa que no dormis bé, que no tinguis gana o que en tinguis massa,...

També disminueix el funcionament de l'escorça prefrontal. Això vol dir que, quan estàs estressat, et costa més pensar, reflexionar i tenir cura de les teves emocions.
